

# *Dangling in a Breeze*

*By Jaden Nicita*

A light, airy, weightless vest lies atop Jaden's shoulders as the laces dangle freely through the shy wind. See them so gracefully tickle his skin, like a butterfly that peacefully glides across the brim of his body. The coffee brown color lets off waves of the steamy, creamy, warm, substance. This 1960s Hippie coat lets off all your peaceful, joyful, chill vibes. A feeling of being as wild as a Bronco yet as peaceful as a gentle breeze that courses fast, yet calm through your veins. With this blast from the past, you'll be so "woke". This magnificent article can be worn in all your settings, whether it be a blooming countryside, or a blazing fire sight. All of your friends will be lining up for this latest, groundbreaking, item, and do you really want to be left in the dust?
